UNIVERSAL LIGHTING RETROFIT KIT

The Green Savings Co. has introduced its T5 line of retrofit kits. Each kit contains a T5 lamp, mirror-like reflector, and adapter that can be installed into any T12 or T8 fixture. Each lamp is self-ballasted and is available in 2-, 4- and 8-foot lengths. Multiple lamp-color temperatures can be chosen as well.

2- AND 3-D DESIGN TOOLS

Kim Lighting has released 2- and 3-D data-formatted drawings for BIM projects. Categories include site and roadway, floodlighting, low level, parking structure, wall mounted and in-grade. The drawings allow designers eliminate the guesswork about how the lighting performs and integrates into the built environment.

RECESSED LED TRIMS

Progress Lighting has expanded its line of recessed LED trims to include a variety of finish options. The trims can be used with the P8071 6-inch and P8026 4-inch LED downlights. Finish options include antique bronze and chestnut to match wood ceilings and black and metallic silver for commercial applications.
